WORK WITH US!
Full Stack Software Developer - App & Web

GoodSAM, a leading ethical technology company that specialises in providing life-saving cloud-based solutions, is seeking an experienced and highly motivated 'Full Stack' Developer to join the team.

At GoodSAM, we pride ourselves on being lean and agile, delivering a high quality and ethical service, working with some of the world's largest ambulance trusts and police forces. In the UK, GoodSAM is the national volunteering platform, and provides innovative technology that alerts first aid trained volunteers to people in cardiac arrest nearby – allowing CPR to begin prior to ambulance arrival. Thanks to GoodSAM's technology, hundreds of lives are being saved each year.

As a developer at GoodSAM, you will play a key role in designing, developing, and maintaining our innovative platform. This is an exciting opportunity for a talented developer who is passionate about using technology for good and making a real difference in the world. If you are driven, creative, and eager to contribute to a fast-paced, dynamic team, we encourage you to apply for this exciting position.

Responsibilities (Include, but not limited to):
- Working with the Technical Director to develop and enhance GoodSAM functionality in line with requirements.
- Develop functionality across Web, Android & iOS platforms
- Take part in Research & Development to allow GoodSAM to remain the worlds most advanced system of its type
- Maintain the GoodSAM technology stack including general maintenance, patching & bug fixing.
- Contribute to the maintenance of GoodSAM's ISO 9001, 27001 & Cyber Essentials accreditations, and attainment of additional accreditations.
- Work directly with other software organisations that GoodSAM integrate with, such as CAD & Third-party storage providers and manage relationships with these organisations.
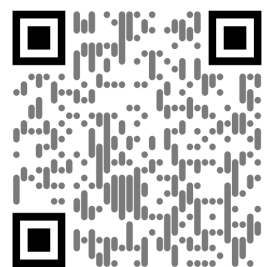

You will bring:
- Experience Working as part of a software development team with a proven track record of delivering high quality digital products.
- Experience with: Git, Intellij, XCode, WebRTC
- Fluency in: Java (OOP), Objective-C (or Swift), HTML, CSS, JS
- Knowlegde of the fundamentals of how the internet/cloud works (DNS, Networks, Load-balancers, Elastic IPs, CDNs etc.)

You will be:
- Motivated and driven to help GoodSAM and (and sister product Clinic.co) grow
- Able to work remotely and independently as well as part of a small team.
- Willing and able to travel globally where required to visit clients or assist with exhibitions.
- Happy to get involved across multiple areas of the organisation where needed to support colleagues.
- A strong communicator with excellent verbal, written & interpersonal skills.

Further Information:
- This is a full-time position, working 40 hours per week on an initial 1-year contract with a view to becoming a permanent post.
- This is a remote position and the successful applicant will be expected to have access to their own suitable working environment with adequate internet connectivity.
- There will be a requirement for the applicant to travel on occasion - such as to the GoodSAM Headquarters in London (UK), spending time on-site with clients, or at exhibitions around the world.
- Salary Negotiable & dependent on experience. For further information (or to apply for this vacancy), please submit a covering letter & CV to careers@instant.help, or online via www.goodsamapp.org/careers
